

SHOTLEY PENINSULA CYCLING CAMPAIGN

From Bourne Bridge to Shotley Point is approximately 10.5 miles (16.8 km)

We are aiming to avoid the busy B1456 as much as possible

We are also investigating a "southern route" using existing bridleways and quiet roads

An opportunity to join the route around Alton Water reservoir

Visit waterside Pub and Restaurant

Foot Ferry to Felixstowe and Harwich available during the summer months

The Shotley Peninsula Cycling Campaign is a voluntary organisation which has been set up to campaign for safer cycling throughout the peninsula. Our priority will be a new largely off-road path, suitable for all types of cyclists as well as pedestrians and wheelchair users. Eventually we hope to link all communities on the peninsula with safe cycle routes and are working with local schools and Sustrans on safer routes to schools.
